Historic Performance

Fund Comment

Persistent global economic volatility led the South African Reserve Bank to keep its repo interest rate unchanged at 7.5% in March. Although headline inflation held steady at 3.2% in February, it has shown an upward trend since Q4 2024. The National Budget, initially scheduled for February, was only tabled in March, receiving mixed reactions from market participants due to the government's delicate fiscal balancing act. The Rand appreciated by 2.0 % against the US Dollar during the month and is up 2.8% year-to-date. In Namibia, the latest inflation print came in at 3.6% for February, up from 3.2% in January 2025. Elevated short-term inflation is expected to weigh on future interest rate cut decisions by the Bank of Namibia. While Namibian Treasury Bill yields declined across most of the curve for much of March, a late-month uptick was observed. Despite this, exposure to the relatively higher-yielding South African Money Market continues to benefit the Capricorn Funds.

Who Should Invest

A conservative investor with a short investment horizon, who expects a higher level of monthly income than provided by traditional banking products and requires a highly liquid and available on demand investment option. Retirement funds are not precluded from investing in this fund.
