## 1. Introduction

This document has been compiled with the aim of providing members of the Benchmark Retirement Fund with an overview of the investment options offered to enable them to make informed decisions regarding the investment of their retirement assets.

The following portfolios are offered to members:

Portfolio	Risk Profile	Return Objective (gross of fees)
Allan Gray Namibia Investment Trust	Moderate	CPI + 6%
Investec Managed Fund Namibia	Moderate	CPI + 6%
AF Namibia Balanced Growth Fund	Moderate	CPI + 6%
Old Mutual Namibia Profile Balanced Fund	Moderate	CPI + 6%
Prudential Namibia Balanced Fund	Moderate	CPI + 6%
Sanlam Namibia Managed Prudential Fund	Moderate	CPI + 6%
Standard Bank Namibia Managed Fund	Moderate	CPI + 6%
NAM Coronation Capital Plus Fund <sup>1</sup>	Moderate-low	CPI + 4.5%
Prudential Namibia Inflation Plus Fund	Moderate-low	CPI + 4%
Benchmark Retirement Fund Default Portfolio	Moderate-low	CPI + 5%
Investec High Income Fund Namibia	Low	CPI + 2%
Money Market Fund	Capital Preservation	CPI + 1%

1. **Please note:** The NAM Coronation Absolute Fund was renamed to NAM Coronation Capital Plus Fund effective 26 April 2011.

A brief description of the risk profiles is as follows:

The aggressive risk portfolios have the following return and risk objectives:

- A return objective of inflation plus 6% net of fees (7% gross of fees) over a rolling 3 year period.
- Short term negative returns are possible with this type of portfolio. Exposure to equities (shares) is normally maximised for these type of portfolios in order to achieve the return objective

The moderate risk portfolios have the following return and risk objectives:

- A return objective of inflation plus 5% net of fees (6% gross of fees) over a rolling 3 year period.
- Aims to achieve this return with as minimal risk as possible, although to achieve this target, the portfolio will have a large exposure to growth assets (e.g. shares) and as such short term negative returns are possible.

The moderate-low risk portfolios have the following return and risk objectives:

- A return objective of inflation plus 3% to 4% net of fees (4% to 5% gross of fees) over a rolling 3 year period.
- Aims to achieve this return objective with minimal negative returns over a rolling 12 month period.

The low risk portfolios have the following return and risk objectives:

- A return objective of inflation plus 1% to 2% net of fees (2% to 3% gross of fees) over a rolling 3 year period.
- Aims to achieve this return objective with minimal negative returns over a rolling 12 month period.

The capital preservation portfolios have the following return and risk objectives:

- A return objective of inflation net of fees (inflation plus 1% gross of fees).
- No capital loss over a rolling 12 month period.

The Trustees do not currently offer aggressive risk portfolios, but will make them available when suitable portfolios have been identified. All portfolios are compliant with the prudential investment guidelines of regulation 28 of the Pension Funds Act.

## 2. Market overview

### 2.1. Long-term market performance

The following graph represents the cumulative performance of some market indices for the period **1 January 2000 to 30 June 2011**.

### 2.2. Medium term market performance

The following table presents the performance of various market indices to **30 June 2011**.

	2009	2010	2011 YTD	One Year	Three Years
All Share (SA)	32.1%	19.0%	0.5%	24.6%	4.5%
JSE: Financials	28.0%	16.5%	2.0%	17.3%	14.7%
JSE: Industrials	30.5%	27.4%	3.4%	32.0%	16.6%
JSE: Resources	35.4%	12.3%	-3.1%	20.9%	-7.5%
All Bond(SA)	-1.0%	15.0%	2.3%	11.3%	13.4%
STeFI(SA)	9.1%	6.9%	2.8%	6.2%	8.3%
MSCI World	1.6%	0.5%	7.9%	15.7%	-3.8%
JP Morgan World Bond	-20.8%	-4.8%	6.1%	-2.9%	1.3%
Rand/Dollar	-22.3%	-10.6%	2.1%	-11.8%	-4.8%
CPI(SA)	6.9%	3.5%	3.6%	5.0%	5.3%

### 2.3. Short-term market performance

The following graphs represent the monthly performance of various market indices for the year ending **30 June 2011**.

#### 2.3.1. South Africa

#### 2.3.2. World

**Market commentary:**

Government debt in Europe has been a main concern in the second quarter of 2011. Portugal requested a bailout plan from the European Union (EU) in April 2011, becoming the third European country to seek financial assistance from the EU, following in the footsteps of Greece and Ireland. This led to the downgrade of Portugal's sovereign debt, which added to the deterioration of credit ratings of government debt in the Eurozone. Concerns regarding sovereign debt have spread to include the U.S., as the credit rating agency Standard and Poor's has placed a negative outlook on the credit rating of U.S. sovereign debt in May 2011. In June 2011 Greece received further bailout from the International Monetary Fund (IMF) and the European Union (EU), following the first bailout package received in May 2010. Greece received this additional funding, worth €12 billion, on the condition that the Greek parliament approved two bills containing austerity measures which need to be implemented. This funding will enable Greece to pay wages and pensions at the end of July 2011, avoiding a Greek default and a possible banking crisis in the Eurozone.

At the beginning of the quarter markets around the world seemed unaffected by the situation in Europe and the U.S., while by the end of the quarter markets started to show the negative impact, as is evident from the performance of the MSCI World Index in dollars. Following the positive news about the austerity measures being approved by the Greek parliament, markets picked up around the world, with the MSCI World Index increasing by 2.7% in dollar terms in the last two days of June 2011. The price of Brent Crude Oil also increased by 3.5% since the approval, however it was down by -4.7% for the overall quarter, ending at US\$ 111.85. Gold increased by 4.8% for the quarter, ending US\$ 1 500.91 per ounce. Inflation has been increasing over the quarter, bringing the year-on-year South African inflation up to 5.0% during June 2011.

**Equities**

The All Share Index (ALSI) had a slight negative performance of -0.6% for the second quarter of 2011, bringing the year-to-date return to 0.5%. Resources was the culprit for the negative performance of the ALSI, with a return of -5.7% over the quarter. The returns for Financials and Industrials were 3.7% and 1.2% respectively. The MSCI index performed positively for the quarter in Rand terms with a return of 0.8%. The year-to-date return as at 30 June 2011 was 7.9% in Rand terms.

**Bonds**

The All Bond Index had a return of 3.9% for the quarter, bringing the year-to-date return to 2.3%.

**Currency**

The Rand had a volatile three months and ended June only 1c up from March 2011. This is a depreciation of 0.1%, which left the month end price at R6.76/US\$.

## 2.4. Namibia

### 2.4.1. Long term market performance

The following graph represents the cumulative performance of some market indices for the period **1 July 2002 to 30 June 2011**.

### 2.4.2. Medium term market performance

The following table presents the performance of various market indices to **30 June 2011**.

	2009	2010	2011 YTD	One Year	Three Years
NAM Total	41.9%	14.8%	-0.5%	21.2%	-1.4%
NAM Local	4.1%	18.7%	11.3%	25.3%	15.9%
NAM CPI	7.0%	3.1%	4.4%	5.3%	6.2%
IJG Bond Index	3.3%	12.8%	1.8%	7.6%	12.1%
IJG Money Market	8.2%	7.1%	3.0%	6.6%	8.0%

Given the uncertainty regarding global recovery, the 2011 GDP growth for Namibia is expected to be lower than was anticipated in the Budget speech in March 2011. At the meetings on 26 April and 22 June, the Bank of Namibia's Executive Committee elected to keep the repo rate at 6.0% in support of growth of the Namibian economy. Low interest rates and fiscal expansion is expected to support GDP growth. Year-on-year inflation continues to increase and ended at 5.3% as at 30 June 2011, the highest it has been since March 2010. The Namibian Stock Market (NSX) had a negative performance in the second quarter of 2011 of -2.5%, reducing the year-to-date return for 2011 to -0.5%.

### 2.4.3. Short term market performance

The following graph represents the monthly performance of various market indices for the year ending **30 June 2011**.

### 3. Performance comparison as at 30 June 2011

#### 3.1. Moderate portfolios

**Benchmark Retirement Fund Default Portfolio**

**Risk Profile:** Moderate-low  
**Size:** N\$ 158m  
**Inception:** Aug-99

**Portfolio Description**

The Default Portfolio has the following objectives:

- To reduce volatility of returns
- To achieve a real return of 4% (net of fees) over a rolling 3 year period
- To reduce risk of large negative returns over rolling 12 months
- To reduce risk by spreading assets between more than one investment manager

The Default Portfolio has a risk profile lower than that of the moderate risk portfolios and as such the expected long term returns should also be lower. The Trustees use their absolute discretion in selecting the best manager offering and reserve the right to appoint or replace Asset Managers at any time.

**Benchmark**

The benchmark for this fund is CPI +5% over a rolling three year period.

**Fees:** 0.75%p.a.

**Portfolio Mix as at 30 June 2011**

Allan Gray Namibia Investment Trust  
 Prudential Namibia Inflation Plus

For the period from January 2004 to July 2007 the Default portfolio assets were invested 100% in the Metropolitan Absolute Return Fund. As from July 2007 the Trustees decided to add the Prudential Namibia Inflation Plus Fund to the default portfolio. It was decided to replace the Metropolitan Absolute Return Fund with the Allan Gray Namibia Investment Trust as from 1 January 2011. Cash Flows would be split equally between the two portfolios.

## 5. Manager summaries

### 5.1. Allan Gray

The Allan Gray Investment Counsel was established as a partnership in 1974. It was incorporated as a public company called AGIC Limited in 1993 and became affiliated with the Orbis Group in May 1997. The company name was changed to Allan Gray Limited in 1997. Allan Gray Namibia was formed in 1996.

Allan Gray's investment philosophy is value orientated, with their research efforts focussing on identifying quality assets priced below intrinsic value. They define intrinsic value as the discounted value of expected future cash flows.

Ian Liddle (Chief Investment Officer), Duncan Artis, Andrew Lapping, Delphine Govender, Simon Raubenheimer and Allan Gray's offshore company, Orbis, are responsible for stock selection of the equity portfolio, whilst Jack Mitchell heads up their Fixed Interest team.

#### Manager Developments

There have been no developments during the second quarter of 2011

### 5.2. Investec Asset Managers

Investec Asset Management was founded in 1991 and is backed up by the Investec group. Investec operate a multi-specialist investment structure, where the investment team is organised into small groups of specialists. Each team is led by a portfolio manager who is solely responsible for his/her product(s).

Investec have a large centralised research team and all portfolio managers and their teams have access to this research. Each portfolio management team and product has a different process and philosophy, and thus will place emphasis on different parts of the common research provided.

John McNab and Mimi Ferrini are the joint Chief Investment Officers, with Hendrik du Toit the Chief Executive Officer. In Namibia, James Hatuikulipi is the Managing Director.

#### Manager Developments

There have been no developments during the second quarter of 2011

### 5.3. Investment Solutions

Investment Solutions is a Multi-Manager that was established in 1997. Being a multi-manager, Investment Solutions do not physically buy or sell securities. They delegate this responsibility to a number of underlying Asset Managers. They are responsible for the selection, blending and rebalancing of the underlying managers.

Investment Solutions is a subsidiary of Alexander Forbes South Africa Holdings Limited. They currently have over R 100 billion of assets under management and are the largest multi-manager in South Africa by assets under management. Investment Solutions also have operations in the United Kingdom, Channel Islands and Namibia.

Glen Silverman is the Global Chief Investment Officer, with Mark Lindhiem the South African Chief Investment Officer. Derrick Msibi is the Managing Director and Jimmy Dantagos is the Managing Director in Namibia.

### **Manager Developments**

There have been no developments during the second quarter of 2011

### **5.4. Namibia Asset Management**

Namibia Asset Management (NAM) was established in April 1996. NAM is 48% owned by Coronation Asset Managers in South Africa and have been partnered with Coronation since inception in 1996. The portfolio management is done by Coronation.

NAM (Coronation) have neither a value nor a growth bias to investing and place primary importance on stock selection over asset allocation preferring to build portfolio's from the bottom up. Coronation follow a single house view approach rather than a specialist approach.

Karl Leinberger is the Chief Investment officer of Coronation with Hugo Nelson as the Chief Executive Officer.

### **Manager Developments**

There have been no developments during the second quarter of 2011

### **5.5. Old Mutual Investment Group**

Old Mutual Investment Group (OMIG) is a member of the Old Mutual Group which was established in 1845. Like all Old Mutual Asset Management (OMAM) companies around the world, it is a subsidiary of OMAM Holdings (Bermuda) which is owned by Old Mutual plc. Old Mutual Investment Group (South Africa) (Pty) Ltd, formerly known as OMAM SA, was incorporated in the Old Mutual Group as a wholly owned subsidiary in 1993 and became a fully contained and independent asset management company in June 1997.

OMIGSA is now made up of different investment boutique teams, which operate separately and independently of each other. Each boutique has its own CIO, but all the boutiques report to the CEO. Their investment decision-making process is based on the identification of opportunities that should translate into strong long-term performance. They pursue an active, disciplined investment process that is supported by proprietary bottom-up research. The boutiques all feed off this common research platform.

The Macro Strategy Investments boutique provides a range of actively managed, balanced portfolios using both quantitative and qualitative analysis to determine the optimal asset allocation for each portfolio. Peter Brooke is the Chief Investment Officer. Tyrone van Wyk is an investment analyst in Namibia, while Lionel Matthews is CEO in Namibia.

### **Manager Developments**

There have been no developments during the second quarter of 2011

## 5.6. Prudential Portfolio Managers

Prudential Portfolio Managers (South Africa) (Pty) Ltd has been operating since 1993. It is a wholly owned subsidiary of Prudential Portfolio Managers Ltd, based in London. Prudential Portfolio Managers Ltd is the worldwide investment management business of the UK listed Prudential Plc group of companies. The head office is situated in London with asset management offices in Chicago, New York, Paris, Hong Kong, Singapore and Cape Town.

Prudential Portfolio Managers (South Africa) have extended their ownership structure to include broader staff ownership. Previously only black staff were afforded the opportunity to own shares in Prudential, but with the new structure all staff now have the opportunity. Staff are to own 31.3% whilst the major shareholder, M&G Investments, will reduce their shareholding from 75% to 47.2%. Prudential have also increased their BEE shareholding with the Thesele Group from 15% to 21.5%.

Prudential Portfolio Managers (Namibia) (Pty) (Ltd) was established in 1996, where Gunton Cloete is Managing Director. Currently all portfolio management is done in South Africa.

Prudential's application of the value investment philosophy involves a four-stage process. The first stage is to identify potential value opportunities, usually through quantitative screening of the available universe of stocks and markets. Each opportunity is then systematically assessed through fundamental analysis. In the next step, risk controlled portfolios are constructed from the stocks and markets that have been identified and, finally, the portfolios are monitored and controlled.

Prudential's philosophy is, however, one of relative, rather than extreme value. This is evident from the portfolio construction where decisions are made relative to an agreed benchmark.

### Manager Developments

There have been no developments during the second quarter of 2011

## 5.7. Sanlam Investment Management

Sanlam's buyout of the minority shareholding in Gensec asset management during 2001 gave rise to Sanlam Investment Management (SIM) Namibia.

SIM's philosophy is that of pragmatic value. Stock picking is based on value criteria, while also focussing on asset prices reverting to their long term averages. Earnings forecasts are also considered. The investment process is further strengthened by progressive technological advances and the team consists of a number of well respected investment professionals.

Johan van der Merwe is the Chief Executive Officer and Gerhard Cruywagen is Chief Investment Officer. In Namibia Tega Shiimi ya Shiimi is the Chief Executive Officer and Andre Roux is the Chief Investment Officer.

### Manager Developments

There have been no developments during the second quarter of 2011

## 5.8. Stanlib Asset Management

Stanlib began in Namibia in 1994 as SCMB (Standard Corporate Merchant Bank). Following on from the merger of SCMB and Liberty asset management in SA in October 2002, the name

was changed to Stanlib. Stanlib Namibia is a wholly owned subsidiary of Standard Bank Namibia.

Stanlib Namibia has a management agreement with Stanlib South Africa and outsource the portfolio management to Stanlib SA. There is 1 investment professionals in the Namibian office who form part of the investment team for Namibia, but the final decision rests with the portfolio manager in South Africa.

Thabo Dloti is the Chief Executive Officer of Stanlib SA whilst Stewert Rider is the Chief Investment Officer. In Namibia Brown Amuenje is the Managing Director and Chief Investment Officer.

### **Manager Developments**

There have been no developments during the second quarter of 2011

### **5.9. Capricorn Asset Management**

Capricorn Asset Management was formed to be the asset management arm of Bank Windhoek. Capricorn asset management is an entirely Namibian company. Capricorn believes in Core – Satellite approach for managing funds. This uses a passive index tracking portfolio as the core for Beta returns and different satellites to add alpha. Tertius Liebenberg is the Managing Director and Ian Erlank is the Chief Investment Officer.

### **Manager Developments**

There have been no developments during the second quarter of 2011

## 6. Glossary

**Asset Allocation:** The weighting of assets in an investment portfolio amongst different asset classes (shares, bonds, property, cash, and international investments).

**BEASSA All Bond Index (ALBI):** Bond Exchange Actuarial Society of South Africa Index.

**Balanced Fund:** An investment portfolio that spreads its holdings over a range of asset classes, which typically include shares, fixed interest, property, international securities, and cash.

**Benchmark:** An index or other market measurement that is used by a fund manager as a yardstick to assess the risk and performance of a portfolio; for example, the All Share Index is a commonly used benchmark for Domestic Equity portfolios.

**Bottom-up Analysis:** A form of security analysis that begins with forecasting returns for individual companies, then moves to industries and, finally, the economy as a whole.

**Capital Preservation Portfolio:** Portfolios that provide investors with a 100% Capital Guarantee (ie. initial investments + contributions + percentage of bonuses received).

**FTSE/JSE All Share Index (ALSI):** A “basket” of shares representing all the shares on the JSE. This index is used as a measurement to indicate price movements in the market.

**Growth Style:** Growth style managers identify companies with above average earnings growth, which they believe will be reflected by the price in future. These shares usually have a higher P/E ratio as the price is higher due to earnings being generated at a fast pace.

**Growth at a Reasonable Price:** An investment style in which the manager selects shares where the company is growing profits, but the share price is not over-priced relative to that growth or shares of which the P/E ratio is below that of the index.

**Inflation (CPI):** The consumer price index represents the increase in the price of a “basket” of basic goods and services e.g. food, petrol. It provides an indication as to how fast prices are increasing in the economy.

**Institutional Investor:** An organisation whose primary purpose in investment markets is to invest its own assets or those that it holds in trust for others. Institutional investors include fund managers, life companies, retirement funds, banks, etc.

**JMCA:** An abbreviation for Jacques Malan Consultants and Actuaries.

**JP Morgan Global Bond Index:** An index which can be used to measure global bond market movements. Countries' bonds across the globe form part of the index, each carrying a certain weight in the index.

**Market Value Adjustment:** A term used with smooth bonus products. All disinvestments which are not for benefit payment (ie switches, terminations) will be paid out at the lower of book or market value. Genuine benefit payments are defined to be payments iro resignation, death and retirement.

**Median:** The middle value that exceeds half of the values in the sample and which is exceeded by the other half. For example, if five items cost R20, R80, R100, R300, and R500 respectively, the median value would be R100, whereas the mean would be R200.

**MSCI World Equity Index:** An index which can be used to measure global market movements. Countries across the globe form part of the index, each carrying a certain weight in the index.

**NSX Index:** A “basket” of shares representing all the shares on the Namibian Stock Exchange. This index is used as a measurement to indicate price movements in the market.

**Price Earnings Ratio:** A stock's market price divided by its current or estimated future earnings per share. The PE ratio is used by the investing public as a measure of the attractiveness of a particular share versus all other shares. The lower the ratio relative to the average of the share market, the lower the market's profit growth expectations.

**Prudential Unit Trust:** A unit trust which complies with Regulation 28 of the Pension Fund Act.

**Regulation 28:** The regulation in the Pension Fund Act providing guidelines for the investments of retirement funds.

**Strategic Asset Allocation:** The composition of an asset mix within a portfolio, constructed with the aim of meeting the long-term objectives of a fund, rather than being based on short-term views of relative performance of the various asset classes. Usually a benchmark is derived in this fashion.

**STeFI:** Short Term Fixed Interest Index. An index used to measure performance for short term (cash) investments.

**Top Decile:** A statistical measure dividing a sample into ten numerically equal groups. Thus, 'top decile' means the top 10% of a given sample.

**Top-Down Analysis:** A form of security analysis that begins with forecasting broad macroeconomic trends, then assessing the impact on industries and, finally, on individual companies.

**Tactical Asset Allocation:** A process by which the asset allocation of a fund is changed on a short-term basis to take advantage of perceived differences in relative values of the various asset classes. TAA can also be described as the variation of asset allocation around the strategic asset allocation.

**Upper Quartile:** A statistical measure dividing a sample into four numerically equal groups. Thus, 'upper quartile' means the top 25% of a given sample.

**Value Style:** Asset managers who have a value style identify shares which trade below intrinsic value in the belief that the share price will return to its intrinsic value. These securities usually have low prices relative to book value or earnings.

**Volatility:** A measure used to define risk which refers to the degree of fluctuation of returns over a specified period (normally short-term). The higher the volatility, the higher the fluctuation of returns which is associated with greater uncertainty of expected returns. This scenario is defined as being high risk.

## Appendix A

The following table represents some salary replacement ratios:

NET contribution towards retirement i.e. AFTER all costs for risk and administration etc (as % of pensionable salary)					
Investment Return for 30 years before retirement (after fees)	8%	10%	12%	14%	16%
CPI + 5%	43%	54%	65%	75%	86%
CPI + 4%	36%	45%	54%	63%	72%
CPI + 3%	30%	38%	45%	53%	60%

The Trustees consider an appropriate post retirement income to be 60% of pre-retirement pensionable income after 30 years of service (assuming that 2% accumulates for each year of service). This ratio is defined as the salary replacement ratio. The above table stipulates a range of ratios for various net retirement funding contribution rates and assuming retirement at age 60. Other assumptions are:

- **Real rate of return before retirement is dependent on the investment portfolio chosen;**
- Investment return after retirement age is 3% real for all scenarios;
- Pension payable as long as member lives after retirement (assumed average of 20 years);
- Inflation rate assumed is 7% per annum;
- Annual pension increase of 75% of inflation assumed;
- No break in service or 100% preservation of accumulated fund credit where there is a change of employer;
- Full fund credit available on retirement (one-third and two-thirds) is used to generate the pension;
- Effect of tax is not taken into account.
