PEWPFS

25. In the case of a PEWPFS, there are additional accounts and reserves within the Employer Reserve Account. For the purpose of this valuation we have disclosed the entire accounts and reserves in respect of the PEWPFS as a single liability. A separate valuation of the PEWPFS as at 31 December 2019 shows that part of the Fund is financially sound.

Members' Share Account

26. Members may participate in the Fund in one of 3 ways:
- 26.1 As an employee of a participating employer;
 - 26.2 As an employee of a SEG; or
 - 26.3 As an individual member.
27. A member's Share is equal to the total net contributions and transfer values received in respect of the member during the period of membership, accumulated with the net investment return earned on the underlying portfolio(s) in which the member or participating employer elects to invest.
28. The sum of the members' Shares constitutes the members' Share Account.
29. Benefits and transfer values payable in respect of members are paid from the capital accumulated in the member's Share.

Employer Reserve Account

30. Participating employers' contributions towards reserves are paid into the Employer Reserve Account. This account is designed to absorb the impact of unfavourable experience and may consist of an investment, risk and data reserve. Unallocated surplus attributable to the participating employers is also transferred into this account.

Living Annuity Account

31. The Living Annuity Account consists of the total transfer values received in respect of living annuitants, less any annuities paid and fees charged, accumulated with the net investment return earned on the underlying portfolio(s) in which the living annuitant elected to invest.
32. Benefits and transfer values payable in respect of living annuitants are paid from the capital accumulated in the Living Annuity Account.

Survivor Annuity Account

33. The Survivor Annuity Account consists of the total transfer values received in respect of survivor annuitants, less any annuities paid and fees charged, accumulated with the net investment return earned on the underlying portfolio(s) in which the Trustees decided to invest. The capital typically arises from the death lump sum benefits of a member of a retirement fund (including the Fund).
34. Benefits and transfer values payable in respect of survivor annuitants are paid from the capital accumulated in the Survivor Annuity Account.

Default Life Annuity Account

35. The annuities are provided through a with-profit annuity from MMI Namibia at a 4.0% post retirement interest rate.
36. The Fund's liability to pay the annuities is offset by the annuity policies.

General Reserve Account

37. The General Reserve Account represents all residual monies in the Fund that are not allocated to a particular member, participating employer, living annuitant or survivor annuitant.
38. The Fund's assets and accounts (liabilities) as at 31 December 2019 and 31 December 2018 are set out in the following table:

APPENDIX 3: ASSET AND LIABILITY COMPARISON

- A3.1. We compared the total liability of the participating employers, SEGs, individual members, living annuitants and survivor annuitants to the assets held in respect of each of them by investment portfolio. Crucially, this shows whether the Fund has any mismatch between how its liabilities and assets will move in future.
- A3.2. From the portfolio schedule provided we could obtain the investment balance of each investment manager. We were also able to determine the allocation of each investment manager's balance to the participating employers, SEGs, individual members, living annuitants and survivor annuitant invested in that portfolio. The resulting asset values were used in the table below. Housing loans are reflected as a separate asset.
- A3.3. We split the liabilities of the participating employer (Share Account plus Employer Reserve Account) and SEG member, individual member, living annuitant and survivor annuitant liabilities according to their investment allocation.
- A3.4. The following table shows the participating employer and the combined SEG member, individual member, living annuitant and survivor annuitant asset and liability split between the investment portfolios. In our view, based on the results in the table, the Fund's assets and liabilities are well matched by investment portfolio as at the valuation date.
- A3.5. The one exception is the NAM Coronation Balanced Defensive Fund. This is due to a timing difference; a disinvestment was done in January 2020 which rebalances the portfolio.
